The following overview only aims at giving you first indications about our destinations at the different periods of the year. We will be more than pleased to share with you more information in order to create for you an unforgettable journey!

**Private charter cruises (booking of the entire boat)** are usually planned by blocks of 5, 7, 9 days or more depending on the destination you chose and the time at your hand. Hence, it is always possible to adjust the cruise length to your needs!

Due to the nature of our business, Silolona is most of the year booked as a private charter but we try to offer a few **cruises for independent travelers (booking by the cabin)** during the year. Please ask us for the most recent status on those cruises.
